Check your wireless usage

Learn how to view your wireless talk, text, and data usage; how usage is billed; and why you might experience overage charges.

Wireless usage includes:

- **Talk** usage displays all outgoing and incoming phone calls, call time, call length, and type of call (network or Wi-Fi® calling).
- **Text** usage shows the phone numbers, type of message sent, and time sent or received if made using the cellular network. Don't see all your texts on your log? Apple® iMessages and Android® Advanced Messaging are sent over Wi-Fi or cellular network and won't show in your text logs. To record all incoming and outgoing texts in your usage log, disable iMessage or Advanced Messaging on your device.
- **Data** usage displays the amount of cellular data used.
- **Hotspot** usage shows the amount of cellular data used for hotspot.

  FYI: The content of text or video messages isn't visible or accessible to anyone on the account.

FREQUENTLY ASKED QUESTIONS

Collapse All

How can I view my usage details?

1. Go to your myAT&T Usage center. Sign in, if asked.
2. Choose the wireless number you want to view.
3. Scroll to and select **See all details**.
4. Choose the usage you want to view: **Talk, Text, Data**, or **Hotspot.**

FYI: Wireless usage including talk, text, and data history is available for up to 16 billing periods. You can download or print detailed logs of all your call usage, text usage, and mobile data usage.

How do I add usage details to my paper bill?

Paper bills don't usually include detailed usage info because that much detail can use a lot of paper - especially during perio high usage.

If you want to add detailed usage info to your paper bill (for a fee) you can contact us.

Note: Detailed data usage can result in paper bill of several pages. Message and data content isn't available.
